STRATEGIC EUROPE VALUE FUND (the "Fund")

A sub-fund of E.I. Sturdza Funds plc (the "UCITS") EUR Institutional. ISIN: IE00B7TRTL43 (the "Representative Class")

OBJECTIVE AND INVESTMENT POLICY

The Fund aims to maximize return on your investment through investment primarily in equities or other asset classes representing the return of equity securities listed on exchanges within Europe, although a maximum of 25% of assets can be invested outside of Europe.

The Fund expects to invest in a concentrated portfolio of between 25-35 individual securities.

The Fund's investments will be primarily listed on a Recognised Stock Exchange and the Fund will target underlying investments that can easily be bought or sold in the market with few liquidity constraints.

It is not anticipated that portfolio transaction costs will have a material impact on performance.

The Fund will also use financial derivatives such as futures and options both to hedge the value of the assets within the investment portfolio and also to gain additional investment exposure where necessary. It is likely that a large proportion of the Fund's assets may be invested in financial derivative instruments at any one time which may enhance or detract from the performance of the Fund.

The performance of the Fund is measured against the MSCI Europe Net Total Return Index.

This Fund may not be appropriate for investors who plan to withdraw their money within twelve months.

This indicator is based on historical data and may not be a reliable indicator of the future risk profile of the Fund.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean risk free.

The risk indicator for the Fund is set as 5, which reflects the historic price behaviour of the Fund. Factors that affect the profile of this Fund include:

- Investments in equity securities are subject to fluctuations in value dependent on market conditions which will directly affect the value of investments held by the Fund.
- The Fund invests with a focus on one region which may increase the risk of investing over a fund that invests in a globally diversified range of countries.
- The Fund invests in a concentrated portfolio of investments that may potentially focus on one or more sectors or industries. The range of investments may provide more risk to the Fund than a more diversified portfolio across sectors and industries.

Additional specific risks of investing in this Fund include:

- **Currency Risk:** the risk that changes in the exchange rates of the currencies of the investments in which the Fund invests may adversely impact the value of the investments held by the Fund.
- **Custody and Settlement Risk:** the risk that the transactions entered into by the Fund are not settled or registered as appropriate.
- **Financial Derivatives Risk:** the risk that financial derivatives may increase or reduce exposure to underlying assets and may create gearing; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund.
- **Liquidity Risk:** the risk that the assets of the Fund may have low levels of liquidity in some circumstances.
- **Operational Risk:** the risks associated with correctly reflecting the value and safekeeping of the assets of the Fund.
- **Taxation Risk:** the risk of changes in taxation regimes, including legal and regulatory changes.

The Prospectus and Supplement give you more details about all the risks for the Fund - see under "Practical Information" for how to obtain a copy.
